

The Renegade Steel Panel Door offers the customer a wide selection of door designs that provide long term strength and security. The Renegade Steel Panel Door is the sturdiest built door on the market with its unique skeletal frame and edge construction making it virtually indestructible. Additional reinforcement is placed at hinge and lock positions for increased strength where it counts. Lock preparation is factory machined so that installation is simple. Doors are foam filled and made from 24 gauge galvanized steel and are factory primed with a rust inhibiting paint.

When ordering a door frame with your door, please specify one of the following door swings:

- left hand out
- right hand out
- left hand in
- right hand in

**STANDARD SIZES:**
